

PROTECT YOUR TREES

don't forget

Protect young trees from grazing animals - goats, sheep, cattle and wild animals will all enjoy to eat the leaves and buds.

Protect your trees so they don't get trampled and pushed over by careless people or herds of cattle.

WATER YOUR TREES IF YOU CAN; WEED THEM, AND BE SURE NO-ONE ACCIDENTALLY DESTROYS THEM WITH FIRE, CUTLASS OR STRIMMER!

Don't just plant seedlings, nurture and grow them into trees! It's better to plant 10 seedlings, and have 7 succeed, than to plant 200 and none survive.
